

## G15P LED Silicone Facial Mask

This product is made of food-grade silicone material, which is safe, reliable, and easy to clean. The interior uses a flexible circuit board (FPC), which can be moderately folded. The human body bionic controller design, LED digital display screen, button operation, simple and reliable control, rechargeable battery, and a USB-A port with power bank function are specially set. The 6 skincare modes can be used to address various skin problems, from beauty to sleep, and provide comprehensive phototherapy services for your skin.
